Technical requirements

conhort
hotel iocandi

Technical and space requirements

- Flat, hard, smooth and non-sloping space of 13x12m including the audience stands.

(If such a space is not available, the performance area can be a 4x9m rosco stage platform, ground level, flat and even. The stands may be installed on a surface that is not completely hard, always subject to prior consultation with the company).

- Minimum height: 6m

- 2 independent power outlets (preferably from different phases):
  - one for sound
  - one for lights

- The company is self-sufficient in terms of sound and lighting. However, if the performance is scheduled entirely at night, some additional lighting support from the organizer may be required.

Other requirements

- Access and parking for a van and trailer

- Bottled water during setup and performance

- Nearby space to the performance site with running water and a mirro

- 2 people from the organization to assist during setup and dismantling

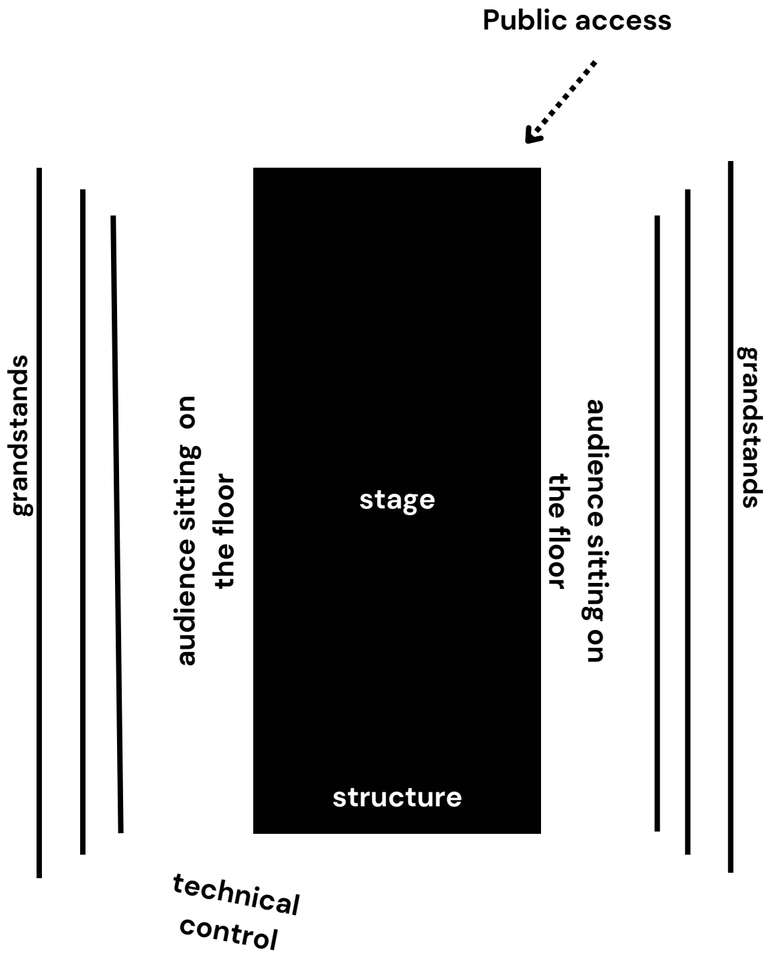
*Conhort is a small to medium-format street performance. We recommend placing it in intimate, low-noise spaces.

**Conhort is conceived as an outdoor performance; however, it can be adapted to indoor or non-conventional spaces.

***In case of adverse weather conditions such as humidity, wind, and/or extreme heat, the performance may be modified or, in extreme cases, cancelled.

The company brings:

- Aerial structure
- Sound machine
- Linoleum
- Sound equipment and microphones
- Lights (*to talk with the company in case the show is performed indoors or at night with total darkness)
- Stands with capacity for 200 people aprox.



Duration of the show: 50 minutes

Duration of the setting up: 5 hours (It doesn't include the warm up of the artists)

Duration dismantling: 2 hours

People on tour: 3
